

HADOOP PIPELINE FOR GoFFiSH

PartitionInputReader.java is driver program

How to Run:

```
hadoop jar cc-1.0-jar-with-dependencies.jar  
in.dream_lab.hadoopPipeline.cc.PartitionInputReader  
/TestPipe/Snap.txt /TestPipe/Spinner.txt
```

Argument 1 : /TestPipe/Snap.txt - Graph input file in the form adjacency list

Argument 2 : /TestPipe/Spinner.txt - partitioned graph (from partitioner like METIS,SPINNER)

(NOTE : Some automation is still pending)

To mention the location of slice files folder:

edit the line 174 in GeneratepartitionSliceReducer.java

Also as an output of the job 3 four files are generated

SPLAL
SPRAL
SPEL
SPVL

the location for these files should be edited everytime in CCReducer.java in line 174-177 and line 139.

and these locations are correspondingly changed in driver program in lines 107 & 119
